

IEX TotalView Training

IEX TotalView Training

TotalView Start-up Training is a programme which will help the user to learn as how to set up TotalView system to achieve service goals and other business requirements. There are 3 modules of Training namely, TotalView Start-up training, TotalView Refresher and TotalView Webinar.

FutureSoft provides consulting on WFM tool (IEX – TotalView) to meet the desired goals of the management/customer and help delivering excellence using it.

Like an old saying, possessing a weapon with out having the knowledge or skill to use that weapon can be more dangerous than not having it. Possessing the skill or knowledge to use a software is as important as procuring a new software. So, it is as important to have people who can use the workforce management tool as having a workforce management tool to improve the efficiency of the organization.

Keeping this in mind, at Futuresoft we have developed various kind of training modules to enable people to use IEX TotalView more effectively and efficiently. Having people with right kind of knowledge to use IEX TotalView will enable you realise return on investment much faster.

TotalView Start-up Training:
